

Your GP appointment time

- Did you know the average GP appointment is planned for 10 minutes
- The appointment is for one person with one problem
- It is important for everyone to keep appointments on-time
- Being late or asking about lots of different problems will increase the time of the appointment
- The knock on effect...

If 20 patients take an extra 2 minutes with the GP; this leaves appointments running late by 40 minutes by the time the last patient leaves
